-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2006.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Paper No(s)/Mail Date. \_\_\_\_\_.  
5) ☐ Notice of Informal Patent Application (PTO-152)  
6) ☐ Other: \_\_\_\_\_.

### DETAILED ACTION

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the steps referring to distillation device e.g., only: "introducing ..into a distillation device.." claimed in claim 9 are not positively recited in the specification.

Claims 12 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

That the temperature at the top of the collection column is kept within  $\pm 1^{\circ}\text{C}$  in claims 12 & 14 provides for ambiguity and confusion. That is, the temperature is at  $\pm 1^{\circ}\text{C}$ ?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0778255.

EP '255 discloses the method/process as claimed. See the abstract, and the claims at cols.11-12. EP '255 at column 3, lines 38-46, and column 3, lines 55-58, through column 4, lines 1-12, for examples, further discloses the amounts of mixed

Art Unit: 1764

gas (corresponding to the claimed reaction gas) supplied or introduced into the acrylic acid collection tower 101, and the amounts of the aqueous medium used respectively (corresponding to the claimed step of "adjusting at least one selected from the group consisting of an amount of water distilled from the distillation device, an amount of the reaction gas supplied before collection, an amount of the aqueous medium used, and a water content in the aqueous medium..". While the claimed  $<1.25$  is not positively disclose, however, column 11, lines 10-13, and the Examples and Comparative Examples of EP '255 all mention the amount or concentration of the acrylic at the top and at the bottoms of the tower which tells an artisan that an optimum range relative to the top and bottoms acrylic values exists.[Any experimentation done to find this optimal range is of the essence within the skilled of the art].

Claims 12 and 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakakura et al discloses a process for recovering chemical products including (meth)acrylic acid or (meth)acrylic acid esters.
